Easy access storage compartment

This high quality serve over counter is the perfect addition to any shop selling fresh fish, showcasing your products beautifully through style and functionality.

Its sleek design features anti-mist glass and LED lighting in the top, making this display case an attractive focus point for your products.

What's more, the 50mm deep tray is a great feature designed specifically to safely store fresh fish on ice. It's important to ensure that the condensation leads directly to a drain.

This serve over display provides easy cleaning with its stainless steel interior and front glass which lifts upwards and stays in place. This unit comes with an easily accessible storage compartment complete with wide doors (these accommodate standard E2 boxes).

If you're looking to expand the effect then the multiplexing options of the SOC range lend themselves perfectly to creating a complete counter solution. Each unit has two 220-240V sockets so you can connect these together, for example with a cash register.

In addition you can also go for custom factory orders for SOC serve over contours to accommodate for different purposes and temperature ranges. Reach out to our friendly sales team for further information.
