Packed Dimension (WxDxH)	mm	1500 x 1450 x 1400
40ft Container Load	pcs	8

Digital controller

Easy access storage compartment

This SOCA corner module is specifically designed for the creation of complete counter solutions, to combine with other serve over counters from the same range. This particular model has the wider side out towards the customer and more narrow towards the staff side. We also offer a model with the opposite dimensions, so you can choose which way you'd like your counter to turn.

This high-quality serve over counter offers a sleek design featuring anti-mist glass, LED top lighting, and a spacious stainless steel deck that stays chilled thanks to both ventilated cooling and airholes on the rear side of the deck. It's ideal for butcher shops and delis looking to create a breathtaking display space. In addition to the stylish design, it is both practical and easy to clean with a stainless steel interior and front glass that lifts upwards and stays in place whilst cleaning. Be aware that if the corner module is installed along with another SOCA counter, you cannot open the front glass on both units at the same time or you risk ruining the glass. Only suitable for use alongside SOCA counters, this can be multiplexed.
