

## UF400VGW

Glass door display freezer

### Product Features

- Automatic defrost
- Electronic thermostat
- Heated glass door
- Lock
- Ventilated cooling
- Adjustable shelves
- LED interior light
- Adjustable feet with rollers to rear

Ventilated display freezer

The UF glass door display freezer is a favourite among our customers and for good reason. The effective ventilated cooling system allows for adjustable shelves, so you can easily organise the freezer according to your present product range, whilst the heated glass door prevents condensation and ensures your products are clearly visible. In addition, the cabinet offers features such as LED interior lighting, automatic defrost, and a digital temperature controller. Whether you're showcasing ice cream or frozen meals, this freezer offers great product presentation at a competitive price.

The TEFCOLD UF range includes both display freezers and storage freezers in several sizes, and we offer matching chillers as well (see UR range).
