Black display cooler

The SCU1425H black display chiller is designed to effectively showcase products. It's intelligent LED interior lighting, integrated into the door frame, illuminates products from the front with vertical strips on each side and a horizontal strip across the top. The black finish emphasises the products in the cabinet, making them stand out and drawing attention to the fridge's contents. The fan-assisted cooling system ensures even cooling throughout the cabinet, enabling quicker temperature recovery during restocking. This display cooler is the ideal choice for making your products stand out among competitors.
