Removable cooling unit
for easy service

Remote control for LED
Color light

With the SCL Combi-Line glass door backbar, you can showcase your product selection while creating the wanted atmosphere in your bar environment. Equipped with advanced LED Color lighting, you can customize both the color and gradient with ease using the included remote control. Whether you want vibrant purple, calming green, deep blue, or energetic red, you can tailor the lighting to match the unique ambiance of your bar environment.

The SCL Combi-Line sets a new standard when it comes to professional bottle cooling. Not only do you get an absolutely gorgeous design, but every little detail has been chosen with care and consideration. The coated skinplate exterior resists scratches and fingerprints, ensuring a flawless look even in busy environments, while adjustable plate shelves let you store bottles of all types with ease.

Yet, what really sets the SCL apart from other backbars is the removable cooling unit. This means that in the rare event of malfunction, service can be done swiftly, and if you have a backup cooling unit in store, you will never have more than a few minutes down time. This is invaluable in busy bar environments.

The SCL-GMU+ range comes with glass doors as standard, but you can customize the cabinet to fit your needs. Choose between a variety of fronts and cooling modules to build the perfect bar setup for your business. The only restriction is that the cooling unit must always be placed to the right side of the cabinet – the rest is entirely up to you.

Drawers:

Choose between a section with two equal size drawers (solid or glass front), two drawers of different heights, three equal size drawers (solid or glass front), or a section with a bottle rack in the top and a drawer beneath. All drawers are fully extendable and illuminated by LED Color lighting when combined with this range.

Solid doors:

You have the option of building a section with a solid door. If you would like an all solid door version, check out the SCL-MU+ range.

Neutral sections:

The neutral or non-refrigerated sections can be placed at the left side of the cabinet, enabling the completion of every bar section in a professional and efficient way.

Cooling unit modules:

The SCL-GMU+ range comes with a machine cooling unit as standard, but we also offer two options for remote cooling: VS and Glycol. The standard machine cooling unit for this product is item number [71060](#).
