### Minibar cooler with low energy consumption

The TM-C range of hotel minibars from TEFCOLD provides an innovative alternative to the traditional "absorption" refrigeration systems of many minibars. The TM-C model feature a compressor refrigeration system that significantly reduces consumption while providing faster cooling of produce. The units runs at a quiet 38dB and using smart programming can be set to function during periods of the day when the room is likely to be unoccupied (for example between 11am and 4pm). There is also a one press silent function that will sleep the compressor for 1 hour, and a one press function to run the refrigeration system for 5 hours when it is restocked to pull down temperature of the product inside. This range comes in a number of sizes including a drawer version. They are suitable for hotel rooms and boardrooms
