This high-quality serve over counter brings style and functionality to any butcher shop or deli. With its sleek design featuring anti-mist glass and LED lighting in the top, this display case makes an attractive focal point. But it's more than just good looks. The 900mm deep deck provides ample space to artfully arrange your meats, cheeses, and deli meals. The stainless steel deck stays cool thanks to ventilated cooling and airholes on the backside of the deck. The serve over display is easy to clean with its stainless steel interior and front glass that lifts upwards and stays in place. The unit comes with an easily accessible storage compartment with wide doors that accommodate standard E2 boxes. The SOC range can be multiplexed to create a complete counter solution. Each unit has two 220-240V sockets so you can connect e.g. a cash register. To customize the serve over counter for your needs, it is possible to choose from a wide range of accessories such as: an extra shelf (for e.g. a cash register), a knife block, mobile plexi glass dividers, shelves for creating different levels, red lights for butchers, and a two level holder for GN-pans. It is also possible to make factory orders for SOC serve over counters for different purposes and temperature ranges. Please contact our sales team for more information.
